SUMMARY

With three years of practical expertise in designing, creating and implementing reliable applications, I am a creative and meticulous desktop app developer. I have successfully completed numerous projects that are distinguished by their user-centric design, efficiency and smooth functionality. I am proficient in Python and SQL. I am good at working in interdisciplinary teams and do well in hectic settings. I use my flexibility to address challenging issues and spark creative solutions. Eager to contribute to Google's innovative and dynamic initiatives while advancing my own learning and development in an exciting environment. I have a strong background in desktop software development and a strong interest in cutting-edge technologies like AI and ML.
